UNIFIED COMMUNICATIONS
PRODUCTS FOR MICROSOFT® Lync™

Microsoft® and ClearOne® Collaboration

ClearOne offers a broad portfolio of award-winning products designed to enhance the users experience with Microsoft® Lync™. Our innovative leadership in areas such as distributed echo cancellation, automatic microphone mixing, signal routing, equalization, automatic level control, compression and other advanced audio processing functions have all been incorporated into our offering for Lync.

ClearOne's Unified Communications products are optimized for Lync enabling all users to experience high quality audio. These products are designed to meet the expectations for Lync users in the office, at home or on the road. The ClearOne offering for Lync enables users a USB plug and play experience with crystal-clear, hands-free audio.

ClearOne's Unified Communications portfolio continues to expand to meet the needs and requirements of Lync customers.

We put the world on speaking terms.

Unified Communications Products for Microsoft Lync

INTERACT™ AT-OC

PG 4

Add your conferencing room to the Communications Server Ecosystem with the INTERACT AT-OC. The INTERACT AT-OC is a complete room audio solution that connects to the Microsoft Lync enabled PC with USB audio.

CHAT® 70

PG 8

The CHAT 70 is a personal speakerphone that connects to PCs and laptops for rich, full-duplex audio communication with Lync. With HDConference™ audio technologies, the CHAT 70 is the perfect audio peripheral for greatly enhanced collaboration through unified communication.

CHAT® 170

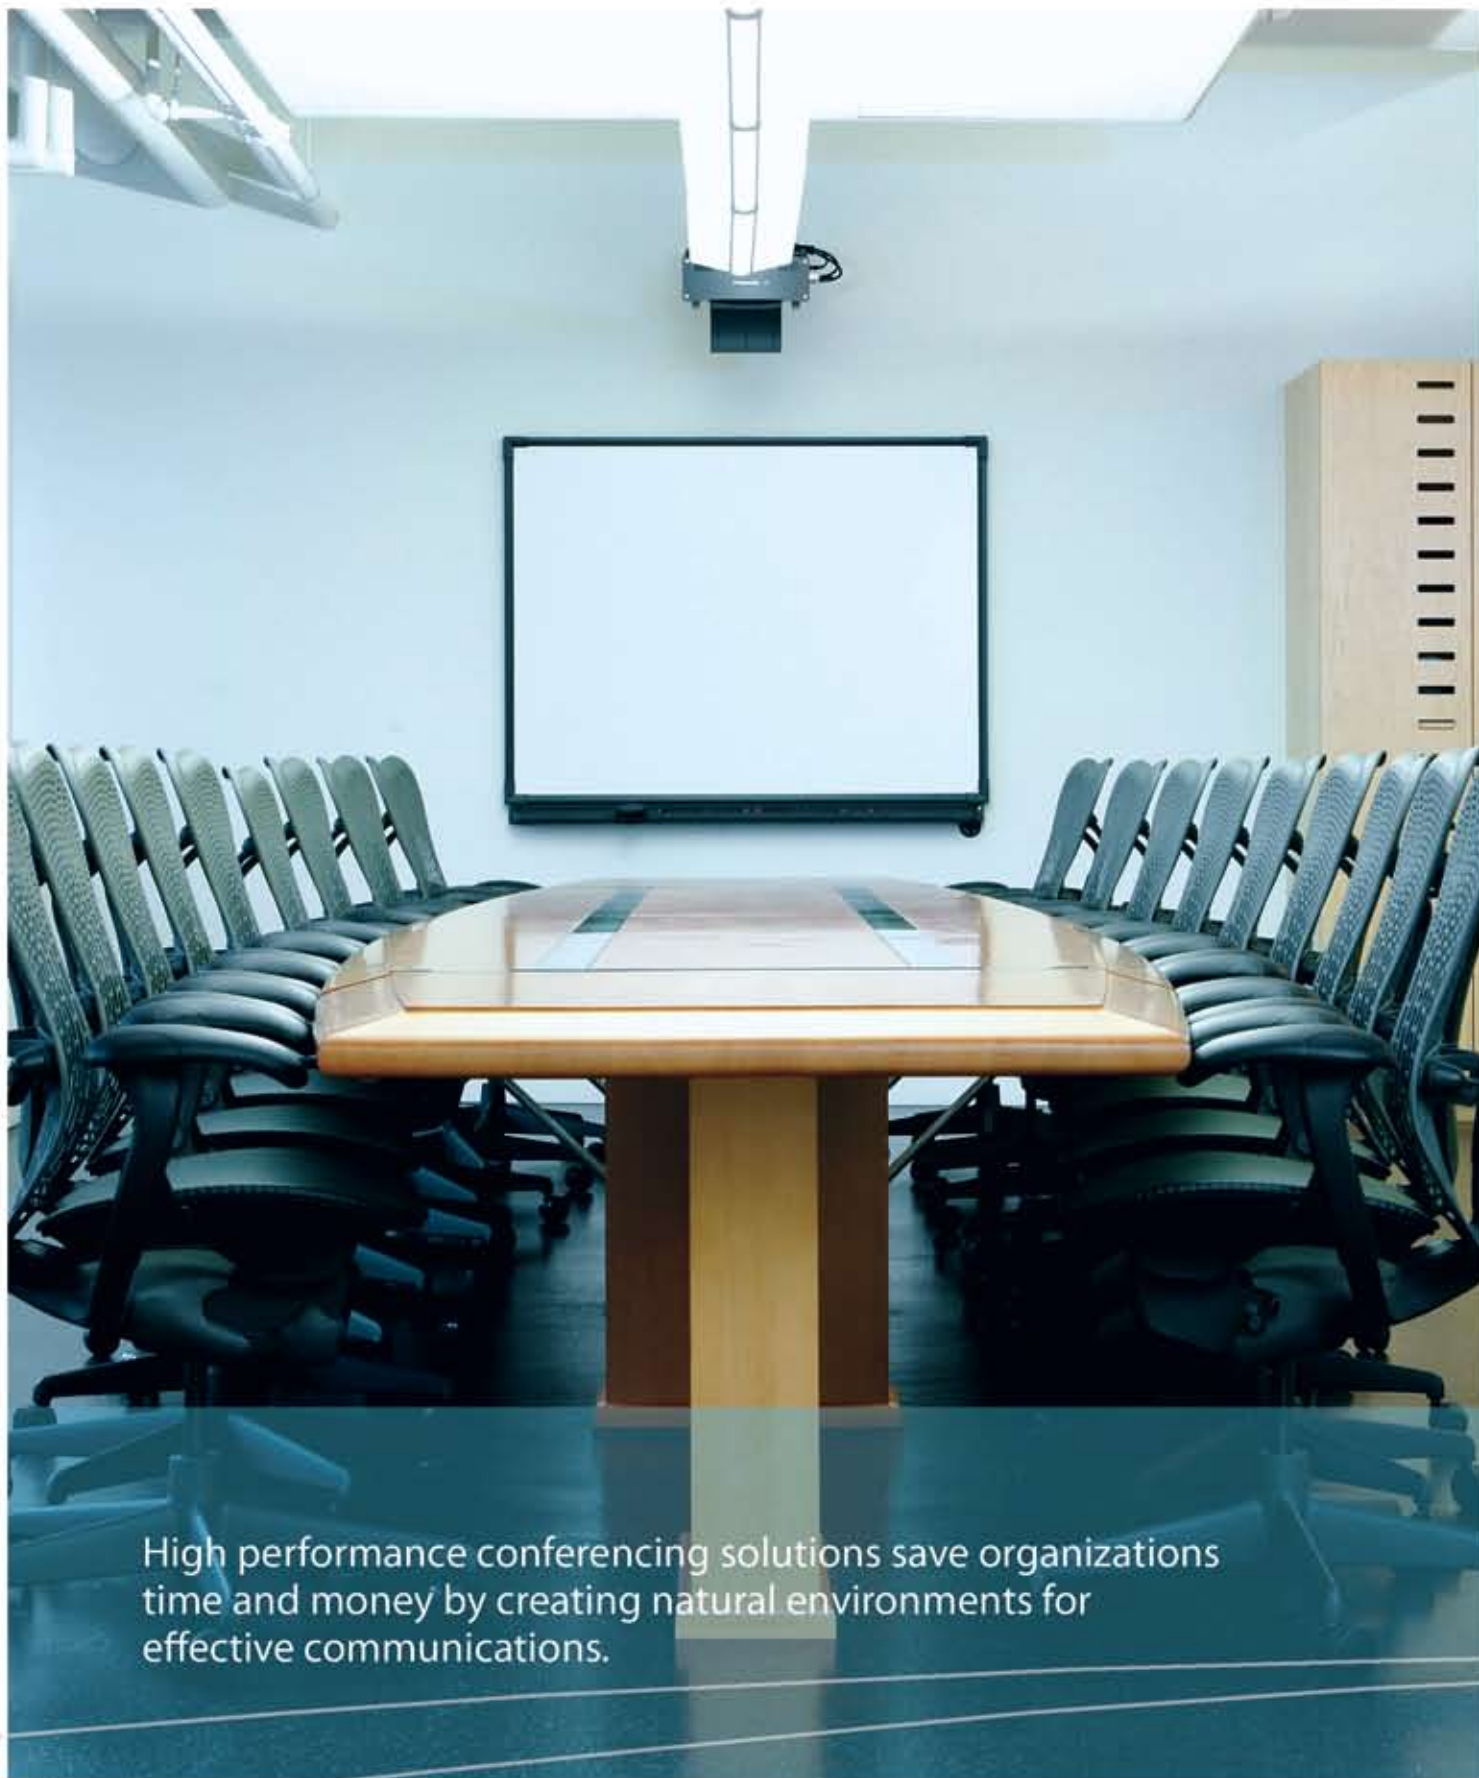

PG 12

A speakerphone for individual or small group use, the CHAT 170 connects to PCs and laptops for rich, full-duplex audio communication with Lync. The CHAT 170 is the perfect addition to the office or conference room for greatly enhanced collaboration.

CHATAttach™ 170 (certification pending from Microsoft)

Lync conference calls are no longer limited to small tables. The CHATAttach 170 facilitates USB conferencing for medium and large conference rooms. The CHATAttach conferencing system, which includes two CHAT 170s, enables even distribution of microphones and loudspeakers as well as centralized access to mute and volume controls.

High performance conferencing solutions save organizations time and money by creating natural environments for effective communications.

Microsoft® Lync®

INTERACT™ AT-OC

Add your conferencing room to the Communications Server Ecosystem with the INTERACT AT-OC. The INTERACT AT-OC is a complete room audio solution that connects to a Microsoft Lync enabled PC with USB audio.

INTERACT AT-OC

Audio conferencing mixer with integrated AEC processing for 9 channels, 2 line input/output, telephone hybrid and integrated amplifier.

INTERACT MIC

INTERACT MIC is a microphone pod with 3 elements providing a complete 360 degree coverage. Audio from INTERACT is sent to mixer via single CAT 5 cable. Up to three INTERACT MIC pods can be used with each mixer.

INTERACT COM

UC interface device that includes a USB audio and headset audio interface for direct connection to PC and enterprise telephone sets. Also includes GPIO interface for room feedback.

INTERACT Dialer

Tabletop controller for dialing and room audio controls.

Speakers

Wall mount speakers provide premium sound in the conference compared to speakerphones.

Microsoft Lync is an important tool for communication and collaboration in the enterprise. The CHAT 70 speakerphone gives users the best hands-free audio experience.

CHAT 70

OPTIMIZED FOR
Microsoft® Lync™

The CHAT 70 is a personal speakerphone that connects to PCs and laptops for rich, hands-free audio communication with Lync. With HDConference® audio technologies, the CHAT 70 is the perfect audio peripheral for greatly enhanced collaboration through unified communication.

CHAT 70

About the same size as a deck of cards, the CHAT 70 is a personal speakerphone that connects to PCs or laptops via USB providing hands-free communication with Lync. Containing HDConference audio technologies, the CHAT 70 delivers full-bandwidth frequency response for rich audio and unmatched full-duplex performance. The CHAT 70 is completely plug-and-play and comes with a USB cable and quick start guide.

- Full-duplex audio performance allows users to listen and speak at the same time without audio cutting in and out
- Echo cancellation identifies and eliminates acoustic echo to deliver audio that is much more intelligible
- Noise cancellation samples the ambient room noise and cancels it out for more natural sounding conversations
- Automatic gain and level controls adjust microphone and speaker levels automatically

CHAT 70 USAGE PROFILES

Microsoft Lync

- + Completely plug-and-play for Lync
- + Incoming calls ring on the CHAT 70
- + Hands-free calls for individuals
- + Perfect for teleworkers or travelling professionals

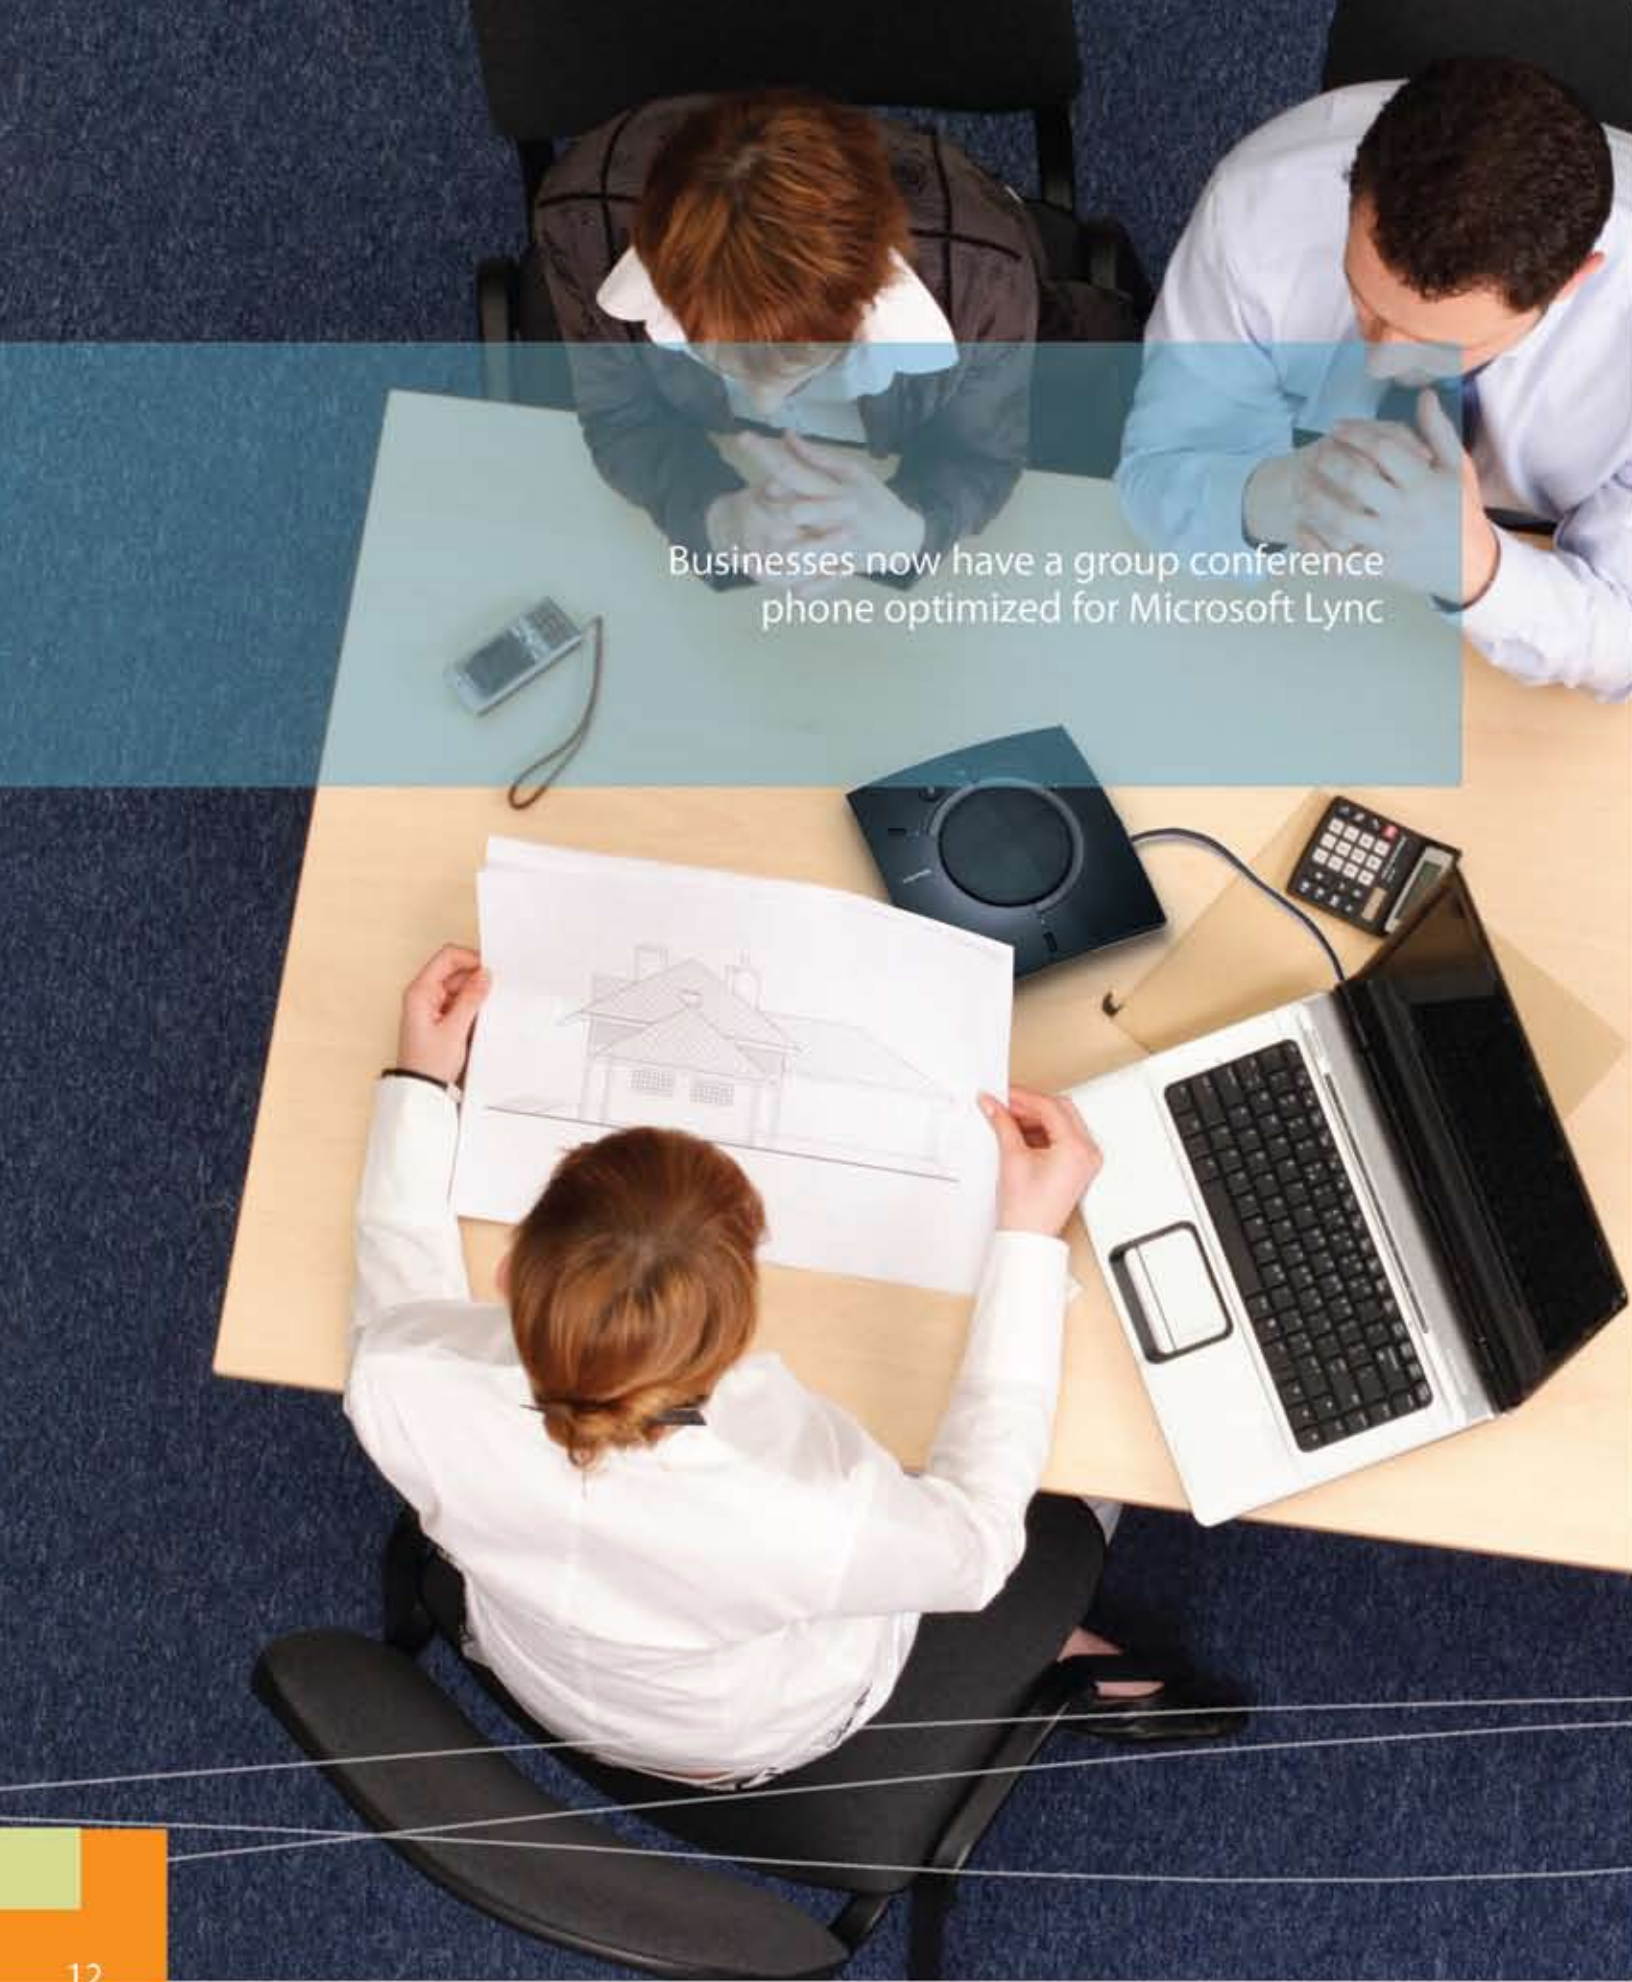

CHAT 70 CONFIGURATIONS

OPTIMIZED FOR
Microsoft Lync

The CHAT 70 contains a USB port and comes with a USB cable for direct connection to your PC or laptop. Complete plug-and-play functionality with Lync, requiring no software or drivers to be installed prior to use.

Businesses now have a group conference phone optimized for Microsoft Lync

CHAT 170

OPTIMIZED FOR
Microsoft® Lync™

A speakerphone for individual or small group use, the CHAT 170 connects to PCs and laptops for rich, full-duplex audio communication with Lync. The CHAT 170 is the perfect addition to the office or conference room for greatly enhanced collaboration.

CHAT 170

The industry's first group speakerphone optimized for Lync, the CHAT 170 connects to PCs or laptops via USB for rich, hands-free communication. The CHAT 170 contains HCConference, our suite of high-performance audio technologies, and delivers full-bandwidth frequency response for crystal-clear audio with unmatched full-duplex performance. The CHAT 170 has 3 microphones for full 360° pickup and a large loudspeaker, making it the perfect audio peripheral for individuals or groups of as many as 6 participants. The CHAT 170 is completely plug-and-play and comes with a USB cable and quick start guide.

- Full-duplex audio performance allows users to listen and speak at the same time without audio cutting in and out
- Distributed Echo Cancellation® identifies and eliminates acoustic echo
- Noise cancellation samples the ambient room noise and cancels it out for more natural sounding conversations
- First microphone priority intelligently changes microphone levels depending on who is doing the talking
- Automatic gain and level controls adjust microphone and speaker levels automatically
