CLEARONE INTRODUCES THE TITAN ARTICULATING ARM DUAL PLASMA MEDIA CART

*The new Titan Articulating Arm Dual Plasma Cart is the industry's first
truly mobile dual plasma media cart*

SALT LAKE CITY, June 11, 2009 - ClearOne (NASDAQ: CLRO), the leading global provider of audio conferencing products, today announced the Titan Articulating Dual Plasma Media Cart, a new addition to ClearOne's Titan line of sturdy and highly durable media carts.

The Titan Articulating Arm Dual Plasma Cart with its unique articulating display mounting system allows the displays to be folded up for easy transportation. When the displays are folded, the cart and displays fit in a standard elevator, fit through standard doors and then unfold for use. The cart accommodates two 42" to 50" LCD or Plasma displays and includes a universal mounting system supporting up to 200 lbs. The media cart boasts heavy metal construction with a scratch resistant finish for a stylish and durable design.

"The Titan Series of carts are built to handle rigorous use," said Scott Woolley, Director, Product Marketing Professional Audio Products, at ClearOne. "They are high enough for easy monitor viewing and provide a nine RU size rack inside to accommodate multiple equipment pieces."

You can see the new Titan Articulating Arm Dual Plasma Media Cart at InfoComm, June 17-19, 2009 in Orlando, Florida, where ClearOne will be exhibiting at booth #5951.
