

## RELEASE NOTES

### New Version of RAV-Ware Firmware and Software for RAV 600/900 and Converge 560/590

#### RAV 600/900 Firmware Release Note (Version 1.1.10)

ClearOne announces the release of new firmware on the RAV 600/900 product line. Coinciding with the firmware release will be a new version of RAV-WARE that incorporates new functionality. The primary changes to the product line include:

- **RAV 900/600 Interoperability with RAV-WARE:** An addition has been made to the RAV 600/900 command protocol to facilitate interoperability with the new release of RAV-WARE. The RAV-WARE (Release 2.1.1) introduces configuration capabilities for the new Converge 560/590 product line. The new command added to the RAV 600/900 is Global Mute (GMUTE).

#### RAV-Ware Release Note (Version 2.1.1)

ClearOne announces the new release of RAV-WARE windows based configuration software. The primary changes to the application are:

- **Converge 560/590 Configuration Capability:** RAV-WARE 2.1.1 allows for user-configuration of ClearOne's new Converge 560/590 product line.

#### Firmware Update Procedure

Perform the following steps in order to upgrade to RAV-Ware 2.1.1:

1. Go to the Windows control panel and select the **Add/Remove Program** option.
2. Locate the RAV-Ware software selection from the program list.
3. Remove the currently installed RAV-Ware program.
4. Place the RAV-Ware 2.1.1 Installation CD into your computer's CD-ROM drive.
5. Follow the instructions that appear to install RAV-Ware 2.1.1.
