## XAP FIRMWARE RELEASE

ClearOne announces the release of new firmware for the following products:

- XAP 800- Firmware version 3.0.7
- XAP 400- Firmware version 2.0.9
- PSR 1212- Firmware version 4.0.7

The new firmware revision corrects potential problems with the Audio Expansion Bus. On a limited number of linked systems, customers reported problems between adjacent linked units.

- Problem: Ranges from an audio "pop" to no audio passed through the Expansion Bus.
- Corrective Action: If you experience any audio problems associated with the Expansion Bus, it is recommended that the new firmware be loaded on the units.

**Note:** The update is included in the G-Ware 5.0.6 Software Pack
