

VIEW™ | Audio Encoder

MLA9101 - IP Audio Encoder

ClearOne®

The MLA9101 provides the gateway for audio to flow into the VIEW network. The MLA9101 encodes and prepares the audio for distribution across the VIEW network. In addition to encoding, the MLA9101 also provides control and power management of the source. Using the MLA9101 greatly simplifies the installation and reduces the amount of hardware typically required of large multi-zone systems.

ENCODING

APPLICATIONS

- + Conferencing
- + Multi-zone Paging
- + Emergency Communications
- + Business Entertainment
- + Sound Reinforcement

ADVANTAGES

- + ClearOne's StreamNet™ technology keeps each zone synchronized so that all zones play within 500 microseconds of each other, preventing an echo effect and keeping the audio and video in synch.
- + Superior Audio Performance - Each MLA9101 comes equipped with a Burr-Brown® 96kHz/24-bit Analog to Digital converter.
- + High capacity, digital signal processing.
- + Power Management sensor.
- + Flexible mounting options.
- + Integration IR learner.
- + Source control.
- + StreamNet™ connected.
