GENERAL

The INTERACT AT-OC solution comes pre-configured from ClearOne for Lync Server application. However, if the Lync Server configuration is ever lost on the unit, it can easily be reloaded to the device by following the simple instructions. It will require installation of the INTERACT configuration software that is included on the CD or can be downloaded at www.ClearOne.com/resources/library.php?content=main.

This software can also be used for advanced audio configuration that may be required for specialized applications.

Step 1: Install the INTERACT Software on the PC and Launch

Step 2: Connect the PC to the USB connector on the Front Panel of the INTERACT AT-OC mixer.

Step 3: Connect to the device by clicking on the Icon below the **Connection** button on the upper left of the pane.

Step 4: Select the **Import File Option** in the **File Menu** at the top.

Step 5: Select the **Microsoft-OC.IUA** file that was included on the product CD and click on the **Open** button.

Step 6: The configuration file will be uploaded to the device. After this is complete a message will appear requesting to reboot device - select **Yes**.

Step 7: This completes the process for loading the file. Close software and use Interact AT-OC as normal.
