ClearOne

Applicable to the CHAT™ 60

Using the CHAT 60 with an Apple iPhone

The CHAT 60 personal speakerphone from ClearOne is designed for high quality hands-free calls with Skype. However, the CHAT 60 can also be used as a hands-free audio peripheral with certain cell phones, including the iPhone from Apple. This document will outline the extra hardware, software and procedures required to make this occur.

> **NOTE**: To connect an iPhone to a CHAT 60, users must tune the CHAT 60 using the CHAT software (available at no charge from ClearOne). This software will only run on Windows PCs (XP and Vista).

Connecting the CHAT 60 to an iPhone will require the following adapter and connector cable:

iPhone TTY Adapter Part number: MA854G/A Available from the Apple Store at http://store.apple.com/us/product/MA854G/A

Cell phone audio connector cable (3.2mm – 2.5mm) Part number: 830-159-002 Available from ClearOne at www.clearone.com.

Once the iPhone is successfully connected to the CHAT 60, you will need to download and install the CHAT software. You will also need to download and refer to the CHAT 60 Users Manual in order to configure the CHAT 60 with the correct audio settings for the iPhone (tune the device). Both the CHAT software and the CHAT 60 Users Manual are available at no charge from ClearOne.

To download the CHAT software:

1. Access: http://www.-clearone.com/support/library.php?content=main&product=94&submit=SEARCH
2. Scroll down to the Software Downloads and Release Notes section and select **CHAT Software Revision 2.0.28**
3. Select **Save File**. The file **CHAT_2.0.28.zip** will be downloaded to your computer.
4. **Unzip** the file
5. From the newly unzipped folder, run the file named **Setup**. Follow the prompts to install the software onto your computer.

To download the CHAT 60 Users Manual:

1. Access: http://www.-clearone.com/support/library.php?content=main&product=124&submit=SEARCH.
2. Scroll down to the Manuals, select **CHAT 60 Manual** and save the file to your PC.

To install the CHAT software on your PC:

1. In the CHAT 60 Users Manual, refer to the section "Installing the CHAT Software for Windows" (beginning on page 7) and install the CHAT software.

To configure the CHAT 60 for use with your iPhone:

1. Refer to "Configuring Your CHAT 60" on page 11 of the CHAT 60 Users Manual to connect the CHAT 60 to your PC and operate the CHAT software.
2. When choosing the appropriate device (page 12, step 6), select **Cell Phone** in the Select 1st column, **Other** in the Select 2nd column, and **All** in the Select 3rd column.
3. Complete the remaining steps in the "Configuring Your CHAT 60" section.
4. Complete the steps outlined in the "Optimizing Sound Quality" section beginning on page 14 to tune the CHAT 60. This will ensure the CHAT 60 is configured to produce the best audio possible with your iPhone.

   NOTE: If you are using the CHAT 60 exclusively with your iPhone, you will only need to perform this configuration and tuning process once. However, if you want to use the CHAT 60 with other devices or applications (including Skype or other PC-based audio programs), you will need to connect the CHAT 60 to your PC, run the CHAT software, and load the appropriate device settings (refer to the CHAT 60 Users Manual for details).
