MAY 2, 2016

Product Versions Released:

- StreamNet Application Suite: Version 3.01.47
- StreamNet Dealer Setup: Version 3.01.47
- VIEW/Netstreams Products Firmware: Version: 3.01.47
- VIEW Pro Products Firmware: Version 3.01.47
- PANORAMA Software: Version 1.0.26

OVERVIEW

Document Purpose:

This document contains the release notes for the Dealer Setup Software and Firmware and the PANORAMA Software for VIEW Pro. The following sections describe the release in detail and also provide other required information.

Product Documentation:

Refer to the following web links for more details about the StreamNet Technology-based VIEW and VIEW Pro products:

http://www.clearone.com/resources#network_media_streaming

SYSTEM REQUIREMENTS AND INSTALL

System Requirements:

- Microsoft Windows XP, Vista or 7, 8.1,10 (32 bit or 64 Bit OS)
- Intel or AMD 600 MHz class processor (1 GHz or higher recommended)
- 1GB RAM Minimum (higher recommended)
- 1GB hard disk space minimum (Additional space is required to store the project files that are created using StreamNet Dealer Setup based on the project file size)
- Ethernet Network Interface to connect your computer to StreamNet Network
- Admin permission to install the software
- Adobe® Flash® must be installed using Internet Explorer™ web browser.

Download

StreamNet Application Suite: Download the **StreamNet Application Suite 03.01.47.zip** file containing the application from the ClearOne web site Resource Library.

PANORAMA: Download the **PanoramaSetup-1.0.26.zip** file containing the application from the ClearOne web site Resource Library.

Install

For any of the applications, after successfully downloading the zip file containing the application, open it and run the included program and follow the instructions provided.

Uninstall

It is not necessary to uninstall any previously installed version of the application.

STREAMNET APPLICATION SUITE (VERSION 3.01.47)

New Products Added

- No new products added in this release.

New Features Added

- Changed the default log level in order to log minimum details.
- Improved audio quality while using balanced-audio input in E120 Encoder.
- Serial Pass-through (one-way) Lua driver has been added as one of the available driver options for VIEW Pro devices. This is a generic Lua driver that allows sending messages from the network to a device connected through Serial port of VIEW Pro Encoder E120, Decoder D110, D210 devices.
- Included the latest version of PANORAMA Software.

Bugs Fixed in This Release

- Fixed occasional loss of audio through HDMI output of D110 Decoder.

Known Issues

- Decoder D210 Audio-Only renderers can not be used until Display screen connected through HDMI.
- Decoders D110 & D210 Audio-only renderers do not appear in static menus.
- Decoder D110 Decoder do not support interlace mode 1080i.
- For USB local playback feature in Decoders D110 & D210 will stop playing the video when very short duration video is used. The current work-around is to make a multiple copies of the video and keep them in the connected USB drive.

Products Related With This Release

- VIEW Pro Encoder E120
- VIEW Pro Decoder D110
- VIEW Pro Decoder D210

Troubleshooting

Make sure that the system is setup correctly. Refer to the Installation and Design Guide for detailed instructions on how to connect devices and terminate wires in the system. You can download this manual in the resource library in the ClearOne website:

http://www.clearone.com/resources#enterprise_streaming

PANORAMA™ SOFTWARE (VERSION 1.0.26)

New Features Added

- Added full screen mode of the application, so that when PANORAMA application is launched it always open with maximized screen size.
- Reduced the switching time between layouts and source on Video-wall.
- Added support for orientations - Landscape, portrait, reverse portrait and reverse landscape.
- Improved Overlay & Audio-mapping features.

Bugs Fixed in This Release

- Cloning of streams now copies all the details properly.
- Maintain Aspect Ratio setting work properly for stream and crop layer.

Known Issues

- Device names for renderers in audio-mapping do not use Dealer-Setup configured names.
- Overlay volume bars are limited to always show in pair as left and right.
