DigiLinX™ Technical Bulletin

KeyLinX™ EIM Splitter and DigiLinX Functionality

The IP-Based Distributed Entertainment Company.

Products Included:

KeyLinX

NetStreams KeyLinX ships with an EIM splitter. This EIM splitter is necessary in all installations, regardless of whether an Audio Port or MU290 power amplifier is included in the job.

It is important that you do not discard the EIM splitter. Not installing the splitter in rooms where a *KeyLinX* is installed can cause signal quality issues with IP Intercom.

Figure 1 shows both sides of an EIM splitter. The splitter is located under the cardboard bottom of the *KeyLinX* box.

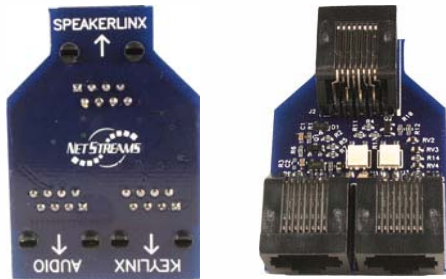

Figure 1   Front and back of an EIM splitter.

Figure 2 shows the EIM splitter in a *DigiLinX* system with an Audio Port and MU290.
