DigiLinX™ Technical Bulletin

iPort™ and iPod® Compatibility Information

DigiLinX uses an iPort to play music, extract metadata, and control song selection from Apple® iPods. First or second generation iPods and the iPod Shuffle are not compatible with the iPort and therefore will not work properly on a DigiLinX system. If your customer has one of these iPods, consider using a NetStreams Audio Port (AP500) to play the music from the iPod as a local source.

Figure 1 shows which iPods are compatible with the iPort.

iPort Control Compatibility

	IPORT	IR CONTROL (THROUGH IPORT)	RS-232 CONTROL (THROUGH IPORT)
5th Generation iPod with video	Compatible	Compatible	Compatible
iPod nano / iPod photo / iPod mini / 4th Generation iPod with Click Wheel	Compatible	Compatible	Compatible
3rd Generation iPod with touch wheel and buttons	Compatible	Not Compatible	Compatible
1st Generation iPod / 2nd Generation iPod	Not Compatible	Not Compatible	Not Compatible
iPod Shuffle	Not Compatible	Not Compatible	Not Compatible
