## **PRODUCTS SUPPORTED:** All CONVERGE Pro and INTERACT Products

**CLEARONE DOCUMENT NTS-0045-001** (REVISION 1.0) AUGUST 2016

DISABIING DRIVER SIGNATURE ENFORCEMENT

#### **OVERVIEW**

This document provides guidelines for disabling the driver signature enforcement for connecting to a CONVERGE or INTERACT Device through USB.

#### DISABLING DRIVER ENFORCEMENT

When trying to connect to a CONVERGE device through USB you may encounter a driver error when installing the software or the USB option will not be available when trying to connect in CONVERGE Console. Windows 7, Windows 8.1, and Windows 10 will not allow in most cases unsigned drivers to be installed and this is why these errors are appearing. Depending on the operating system you are using there are different processes to allow these unsigned drivers to install and allow you to use the USB option when connecting.

#### Windows 7

Disabling driver signature enforcement for Windows 7 is a onetime change, and when you restart your computer the settings will revert back to what they were previously.

- 1. Restart the computer.
- 2. Start tapping the F8 key on your keyboard until you have either the boot select screen (See Fig. 1), or the Advanced Boot Options (See Fig. 2).

NOTE: Not all computers will go directly to the Advanced Boot Options when tapping F8.

Figure 1

- 3. If you come to a boot select screen (See Fig. 1), get ready to tap F8. Scroll down to your hard drive option (This may be labeled differently than what is shown). Hit Enter and start tapping F8 again. If this was done correctly you should get to the Advanced Boot Options (See Fig. 2).
- 4. Once you are to this screen (See Fig. 2), scroll down to the Disable Driver Signature Enforcement and hit Enter.

Figure 2

5. Your computer should startup as it normally does. Further instructions below in Section 2: Installing Drivers depending on what device you are trying to install drivers for.

#### Windows 8.1

1. To begin in Windows 8.1, move your cursor anywhere along the right side of the screen, and hold it there (See Fig. 3) until the pop out menu appears (See Fig. 4).

Figure 3

- 4. Click Settings (See Fig. 4).
- Click **Power** then hold **Shift** and select **Restart** (See Fig. 5). 5.

### Windows 10

- 1. To begin in Windows 10, select the Windows icon in the lower left hand corner of the screen (See Fig. 6).
- 2. Click on the **Power** button (See Fig. 7).

Figure 6 3. Hold **Shift** and select **Restart** (See Fig. 8).

### Windows 8.1 and 10

- Your computer will restart and when it comes back up, it will be in the Advanced Boot Options. Select **Troubleshoot** (See Fig. 9).
- 2. In the Troubleshoot menu, select Advanced Options (See Fig. 10).

- 3. In the Advanced Options menu, select **Startup Settings** (See Fig. 11).
- 4. In the Startup Settings menu, select **Restart** (See Fig. 12), your computer will restart and come up in the **Startup Settings** screen (See Fig. 13).

Advanced options		Startup settings
System Restore Use a restore point record PC to restore Windows	d on your COmmand Prompt Use the Command Prompt for advanced troubleduoting	Restart to change Windows options such as:
System Image Recovery Recover Windows using a system image file	work Startup Settings Charge Windows storing behavior	Enable low-resolution video mode     Enable debugging mode     Enable boot logging     Enable Safe Mode
Automatic Repa	ir Asseston	Usable enver signature endorcement     Oisable early-launch anti-malware protection     Oisable automatic restart on system failure     Restart

Figure 11

Figure 12

5. When the Startup Settings screen appears press **F7** to "Disable driver signature enforcement" (See Fig. 13). At this point your computer will restart.

	Startup Settings	
	1) Enable debugging	
	2) Enable boot logging	
	4) Enable Safe Mode	
	5) Enable Safe Mode with Networking	
	6) Enable Safe Mode with Command Prompt	
	7) Disable driver signature enforcement.	
-	8) Disable early launch anti-malware protection	
	Press Enter to return to your operating system	

Figure 13

6. Your computer should startup as it normally does. Further instructions below in <u>Section 2: Installing Drivers</u> depending on what device you are trying to install drivers for.

#### **SECTION 2: INSTALLING DRIVERS**

In this section we will show you where the drivers are located to install after you have disabled the driver signature enforcement on any Windows operating system.

- 1. Navigate to your computers (C:) Drive (See Fig. 14).
- 2. Select **Program Files (x86)** folder (See Fig. 15).

#### Installing CONVERGE Drivers

1. Select the **Drivers** folder (See Fig. 18).

 If your computer is a 32 bit operating system run the CONVERGE\_Installx86\_W7, otherwise right click on the CONVERGE\_ Installx64\_W7 and choose Run as administrator (See Fig. 19).

Figure 19

#### Installing INTERACT Drivers

- Once in the INTERACT folder, select the folder labeled 1.0 (See Fig. 20). 1
- In the 1.0 folder select Drivers (See Fig. 21). 2.

Figure 20

Figure 21

If your computer is a 32 bit operating system run the INTERACT\_Installx86\_W7, otherwise right click on the INTERACT\_ З. Installx64 W7 and choose Run as administrator (See Fig. 22).

At this point you should be able to run CONVERGE Console or the INTERACT software and use the USB to connect with your CONVERGE or INTERACT device. If you are still experiencing connection issues with the USB option move to an IP connection. Please contact our Technical Support team by calling 800-283-5936 or by email techsupport@clearone.com with any questions you may have.
